Overall Program Philosophy

The Y's Before & After School Child Care Y program expands learning beyond the classroom. Children are celebrated for their uniqueness and provided with multiple opportunities for growth and development through a variety of activities. Our goal is to expand our students' learning by emphasizing the engineering design process which is a methodical approach to problem seeking and encourages children to start by asking a question, imagine the possibilities, plan a course of action, execute the plan and then brainstorm how to improve.

YMCA programs are all about fun, games, encouraging individuality and building strong, confident, healthy kids. During YMCA programs, Y staff members get to know participants, learn about their passions and personality, and work to celebrate who they are and who they will become. Kids in YMCA youth programs are exposed to new experiences, different cultures, creative projects and tons of fun! Whether it is time for homework help, exploring science themes, outdoor adventures or creating group art projects, the Y believes in safe, supportive programs that foster a community within the school.

The nine exploratory components are integrated into the program throughout the school year:

- 21st Century Skills, the Arts
- College and Career Readiness
- Family and Parent Engagement
- Global Learning and Inclusion
- Health and Wellness
- Academic Enrichment
- Leadership Development
- Service Learning

Homework assistance, snack and physical activity are provided daily.

Care Provided at the Following Schools:

- Monterey
- Mountain Vista Community School
- Oak Creek
- Soaring Eagles
- Wildflower
