

How to use a QR Code to sign in

At the my.hsd2.org portal page (either the Chromebook login screen, or within the browser on a Windows computer), you can use the QR code given to you by the school instead of typing in the username and password fields.

Click on the Badge Login button to open a new window and activate the camera on the computer. Hold the QR code up to the camera, and the camera will automatically scan the code and log the student in.
